

HOSE - FLEXIBLE AIR DUCT

HOSE YELLOW

FUNCTIONING PRINCIPLES

Hose - flexible air duct dedicated for moving large volumes of air in portable or permanent air heating and ventilation system. Ideal to connect with air blowers. Special construction is the results of long MASTER experience in portable air heating and ventilation solutions.

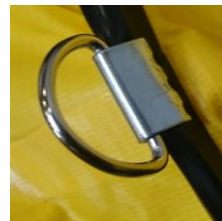

Single-ply yellow FR PVC coated fabric hose reinforced with a spring steel wire helix & black external PVC wearstrip. One end of the hose is equipped with conical connector (1) with tape clamp designed for quick attachment and zipper connection. Second end is also equipped with zipper (2) to connect one hose to another and extend the total length. Moreover yellow colour is very well visible on installation side. The duct is supplied with 5 hanging hooks (3, 4) for easy and quick hanging. Retract ability allows for convenient storage & easy transport. Great compressibility.

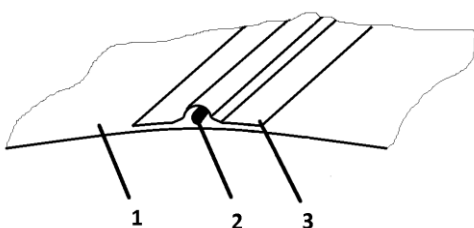

1. Conical connector with tape clamp and

2. End of hose with zipper connection.

3,4. Hanging hooks .

Construction of part B.

1. Single-ply yellow FR PVC coated fabric; 2. Spring steel wire helix for reinforce the hose; 3. Black external PVC wearstrip.

TECHNICAL DATA

Available diameters	mm	Ø230, 305, 330, 407, 450, 508, 610,710
Lenght	m	7,6
Temperature range		- 20 ÷ +85°C
Material		Flame Retardant PVC fabric coating
Fire-resistant coefficient		B grade
Oxygen index		≥ 30

PACKING

Hose dimension	mm	Ø205x7600	Ø250x7600	Ø305x7600	Ø340x7600	Ø407x7600
Dimensions packing (WxLxH)	cm	25x25x28	30x30x28	34x34x26	38x38x25	45x45x23
Net weight	kg	3,7	5,3	5,8	6,7	15
Gross weight	kg	4,1	5,7	6,5	7,5	16

COMPONENTS

Fixing tape with clamp	self fastening galvanized clamp
Zipper connector	extra-durable with strong molded plastic teeth hold
Hanging hooks	galvanised steel
Reinforcing spiral	helix spring steel wire

ACCESSORIES

BAG FOR HOSE	407mmx760cm; 305mmx760cm
